

Tools used to Assess Client's Personal Co-ordinates ©

- Sacred geometry and Pi Charts
SG is the core natural (scientific) formation of the perfection of spirituality and the Cosmos as manifest in the spectrum of nature and, at a root or axial level, human-spirit beings. It is very powerful as it forms the foundation of all humans' subconscious and superconscious minds and reminds everyone of their purpose on earth – to evolve and grow their personality/character to ever higher states - NOT to earn money to the exclusion of all else. The perfected form of nature in woman/man is maintained throughout life if individuals live in alignment with their core nature of not deviating down the outer paths of 'outer sense' pleasures which, if taken too far, will adversely affect the physical form/body AND the conscious/subconscious minds of the human being. Certain drugs offer insights into the highest (and micro) state of human-spirit beings.

Crucially important in The Story. People with significant Sacred Geometry numbers, roots and squares in their Personal Co-ordinates have major roles in The Story.

All natural reality emanates from the Golden Section – Perfection in its smallest and purest expression of being. The larger it grows, the further away from its pure roots it moves.

- Perfect Numbers
Important in symbolic terms and in consideration of Sacred Geometry. These numbers are used extensively to promote The Story, its calendar and the Key Players.
- Chinese
Wisdom on the vibrational nature of the body – its pressure points and meridians – i.e. nodes and channels of energy and their opposites, known as Yin and Yang. It understands how different parts of the body are interconnected which means, for instance, seeing what is going wrong in the abdomen by looking at the face, hands and other key points of power.
- Chakras and Meridians
Indian or Eastern version of the Chinese system of health. Chakras represent the wheels or vortices of power/energy in the body and the lines of energy and power that lead from them.
- Dowsing
Using a tool (e.g. crystal) on a string to sense the vibrations of objects or people to ascertain their vibrations and whether they are good or bad, powerful or weak, healthy or dangerous. Similar to external antennae. Important in The Story.
- Periodic Table and Chemistry
The PT forms a 'grid' upon which the human race and 'time' is set against. Many terms and words in Chemistry have multiple meanings which are used in The Story, as are people with names that reflect chemical messages. Cross referenced with the future and critical figures in The Story.
- Tarot
This is VERY important to illustrate the journey and outcome of a person's life. The cards/numbers 1 to 22 (or 21) represent various stages of individuals' development as a human being, reflecting her/his beliefs as they are programmed via the system (upbringing, parents, diet, education system, absorption and release, work and surrounding media or information in the air/ether). Additionally, it reflects individuals' journeys once they break free of limiting beliefs and go out into the world to discover the truth about Reality-Illusion and good-evil.
It is vitally important to many CORE Story or Agenda tools and areas of Sacred Info or

Symbolism Info.

Examples: Card 1 = The Fool: The innocent and ignorant spiritual-human being starts out on his journey of life and learns the difference between truth and lies, good and bad.

Card 10 = Wheel of fortune: Two countervailing forces and axis that rule the world and everyone on it.

Card 16 = Tower card represents chaos and a breakdown of systems. It came into focus on 9/11 in 2001 at the Twin Towers in NYC.

- Alchemy - of Physical-Mental-Spiritual (PMS) bodies
This is the process of self-knowledge of one's own Physical-Mental-Spiritual inter-relationship and the effects that people, situations, different countries and products ingested have on all your bodies (PMS above). It is the process by which individuals strive to attain the Philosopher's Stone of Spiritual/Sacred Knowledge not just of the Universe but of the human's own body and mind and the insights offered by living in alignment with the core human-spirit being. Its proof of validity lies in the revelations and experiences that happen when travelling to high and low points on the earth's surface whilst living as close to the core of your being as possible. Proof furthermore, lies in the absence of illness or disease whilst living at highest, lightest holistic level possible - natural food only plus all forms of 'Ascension', including exercise and mental/physical progress.
Connected to tarot and all spiritual streams.
- Sound and Light (spirituality)
In its elemental form, like the whole catalogue of Nature, Science, Astronomy and anything to do with The Universe (in its Natural state), Sound and Light is the Central Path: it is the AXIS of impartiality, objectivity and NOTHINGNESS. It is neither good nor bad – it just IS..... It is man who manually (at first) orchestrates and manipulates nature to benefit either the whole of mankind or favour only a small section of society.
For example oil can be processed in a sustainable, non-polluting way to benefit not only man but the planet as well – in a non-harmful, non-polluting way, just as energy and power can be produced from FUSION, or the charging of Matter and Anti Matter forces (when electrons fuse they produce a massive amount of energy). In the same way the vibrations in the Universe can be channelled to produce beautiful music and the rays of light/colour can be diffracted and spliced to produce beautiful images through a LENS (film), to mirror the lens of the eye that is the gateway between the real and illusory or imagination.
Divides Force from Power.
- Greek Language and Roman Numerals
Very relevant in the New World of the reincarnated Biblical and Mythological gods and goddesses/kings, 'princes' and queens. Examples: XI and IX have different meanings in Greek, English and Roman Numerals – and all are used to promote The Story.
The letter for the term 'phi' (the Golden Section or Magic Square) is Φ which is also the symbol for the Underground rail system in the UK. It is widely used in the promotion of the Story/Agenda.
- Creativity (e.g. music, film)
- The whole catalogue of Creativity is used in the Promotion of The Story. See 'Icons' Appendix .
- Fission and Fusion
The twin forces (the Two Paths) that determine direction and future. Can work with each other for a DOUBLE benefit to all that come within its reach or a DOUBLE negative for those who don't (e.g. money). These are the two forces that dominate the world of the conscious and subconscious. Clockwise and anticlockwise.
Fission is the splitting apart of forces (96) and Fusion is the merging and working in

harmony (69). The human race is taking the path of Fission.

○ Bird and Animal kingdom

To represent different states or planes of the human-spirit being, e.g. birds represent the highest, lightest and most pure state of spirituality; reptiles reflect the lowest, most debased and degraded level of mankind where he can't rise to anything except manipulating and destroying his fellow man. This happens frequently when individuals have no control (particularly financial) over their own lives and is therefore the path the human race is on (removal of free access to money). Both are used by the Key Players.

○ Mythology

Inclusive of Greek, Norse, Druid, Pagan, Irish, Vikings, Scottish, Egyptian, Indian, German and the Bible.

The names of the mythical characters are widely used to represent today's 'icons' and their symbolic value in The Story.

○ Tetraktys

The application of Sacred Geometry and Sacred Wisdom to the human's whole being: their Physical-Mental-Spiritual conscious/subconscious states and planes of awareness. By living in alignment with the Central Path of optimum height, motion, speed and lightness, humans can mentally and spiritually access the 'Universe' of information and Truth that surrounds them and 'read' the past, present and future.

Closely linked to Maths, Music, Geometry-Numbers, Astronomy, Metaphysics, Outer Space, Alchemy, Pythagoras and Fibonacci and Animation.

○ Planetary Ley Lines and Power Points

Aligned to numbers and frequencies of power on earth. When there is a juxtaposition of humans and 'high' points (Power Points) on earth, especially at major axes of land/water and fissures in earth's crust, there is usually a massive realignment of the human towards her/his Spiritual Path and they are forced to confront human issues (such as money and outer sense habits, career or emotions/relationships) that are holding them back from seeking out their true desired path or destiny.

○ Planets and Astrology

The astrological houses/planets are cross referenced in many contemporary, current and 'real' disciplines: important astrology signs appear in Geography (latitude and longitude), the Tarot and the Bible, for example the 'Lion of Judea' is another name for Christ – this is represented by 'Leo' in the Astrology System is a common feature in Tarot Cards and many of the astrological symbols are referenced in the Old Testament of the Bible, as is the future state of mankind. The symbol for 'Leo' is a **shepherd's crook** – a synonym for Jesus Christ.

Mars, the planet of 'War' uses the phoenetically spiritual sound of 'AM' in its name – a major contradiction in meaning (using spirituality to progress the state of war).

○ Politics

Many politicians bear names and identifying labels that promote The Story, specific religions and Key Players.

○ Physical Geography

Geological and physical geography bear names that are important in sacred wisdom and the Kabbalah. Many very sacred areas of the world represent important figures in The Story and in certain religions.

○ The Bible

Many biblical events, people and situations have their roots in Sacred Wisdom and

numbers and are frequently referenced (often in code form) in current events in news, creative and business, computing and health world.

- Ascended Masters
Also known as The Great White Brotherhood, Rosicrucians, MajestYTweleve – all facets of the superior beings that rule the world.
- Martinists
Martinism is a form of mystical or Esoteric Christianity that perceives the character of Jesus Christ as "The Repairer" who enables individuals to attain an idealised state such as that in the Garden of Eden before Mankind's fall. Highlighted are numbers that important in Numerology and Sacred Geometry. Martinism dates back to late 18th Century France.
- Kabbalah
Contain nodes and channels, as do the eastern religions. Names and routes based on Egyptian and Pythagorean wisdom. Very important to the Story and its Key Players.
- Raelians
'Rael' links in music and to Jews and aliens.
The **Raëlian Church** is a UFO-based religion that supports human cloning.
It believes that God and souls do not exist; but believes that extraterrestrials who created humanity sparked the founding of major religions.
- Intuition
Seeing people, events and situations from the 3rd point or from Outer Space or the top of the mountain: the lightest, highest and most objective aspect of living.
- Root meanings of words*
The meaning in the elemental SOUND of words, in different root languages, which meaning was formulated hundreds of years ago but which has often become lost in the many interpretations of words. *See examples
- *On Scale of 1-10: some aspects of each feature of the Tools are more significant than others.*
- *Roots of words - *Examples*
 - broccoli - "little nail"
 - robot - based on the Slavic word *robota* "work" or "slave labor".
 - vodka = "little water"
 - opera - "work"
 - phil-os - fondness; friend, philosophy, anglophile,
 - annus - ring, year annular; annual,
 - man-us - hand manual, manipulate
 - oven – from 'ove' meaning *of women*
